SOUTHLAND NEW ZEALAND

TUESDAY 14th JANUARY 2025, 3.30PM

**ON FARM SALE OF ELK/WAPITI SIRES AND
ADULT COWS**

"your genetic key to profit"

bidr

TIKANA

SOUTHLAND NEW ZEALAND

Nau mai, haere mai ki Tikana

Welcome to our 2025 on farm sale at Tikana.

Within our industry Wapiti are flying high with premiums being paid for Elk/Wapiti velvet and Elk venison. Exciting new markets for Elk meat in North America allows farmers to achieve a schedule premium for more than six months of the year. At last progeny of Elk/Wapiti terminal sires will be able to grow to their potential and farmers be rewarded accordingly.

Venison will always have a niche at the top end of the market and appeal to the discerning consumer. Therefore how we farm our deer and manage the environment are critical factors to maintain that market. We must maintain our position as innovators and leaders.

Make sure you know the direction you want to head with your deer farming operation. Choose a stud breeder who is making genetic improvements in those traits that will help you achieve that direction.

A Genetic Trend Graph shows how a breed is performing over time for any particular trait. In the following pages the green line shows the progress of 23 Wapiti herds and the dotted line shows how Tikana is performing relative to those other Wapiti herds.

We thank past purchasers and welcome you and new buyers to our 2025 offering.

Ngā mihi

Dave Lawrence & Donna Day

www.tikanawapiti.co.nz

GENETICS AT TIKANA

Our breeding objective at Tikana is to make a difference to the New Zealand Deer Industry by producing genetically superior animals for the benefit of other deer farmers.

The Tikana herd has been fully recorded on DEERSelect since 2005 and where appropriate we have been selecting based on eBV's (estimated Breeding Values) generated since 2010. An eBV is the genetic merit of an individual for a given trait once all environmental factors are removed. eBVs put a figure on the genetic worth of an animal for a given trait and indicate the amount that the progeny of that animal will gain or lose for that trait. They are an invaluable tool for selection.

Aside from the obvious conformation and temperament traits we select for:-

GROWTH = Yearling Weight = WT12eBV = How many kg heavier at 12 months old than the 2005 Wapiti average

MEAT = Lean yield = LEANYeBV = the amount of lean muscle per kg of carcass, adjusted for an average 12 month carcass = the extra kg of venison boned off a carcass at a standard weight. It is the best eBV for meat as it uses and balances all available information to indicate above or below average muscling/kg of carcass weight.

MEAT = Eye Muscle Area = EMACeBV = How much larger eye muscle/backstrap in cm² than the average 2005 Wapiti. Selecting for this trait increases the yield of the higher value carcass cuts. Selecting for this trait increases the dressing out percentage and the meat to bone ratio. Selecting for this trait increases tenderness of venison and eating quality.

TERMINAL INDEX = combination of growth and meat traits economically weighted. It represents how many more \$/hind mated a Wapiti bull will make you.

PARASITE RESISTANCE = the Antibody produced in saliva that occurs in response to parasite challenge = **CARLA10eBV** = progeny of high CARLA sires grow faster, cope better with parasite challenge, reduce pasture contamination by shedding less eggs and larvae.

VELVET = Mature Velvet Weight = **MVWeBV** also beam diameter and style. NB This is within herd only as no Wapiti herds are connected for velvet

top 2%
top 10%
top 25%
top 50%
below 50%

The official published Wapiti Across Herd Sire Summary now means the eBVs for growth, meat and terminal index can be directly compared across Wapiti herds. Using the official December 2024 DEERSelect summary of all 2021 born Wapiti (755 deer in total) as a reference point, the table below shows where this year's offering of Tikana bulls rank.

The colour code for the percentile bands for traits and Index is based on all Wapiti on DEERSelect based on their birth year cohort.

Please note the eBV values in our catalogue are only comparable to other Wapiti herds and not Red Deer herds at the moment.

Standardisation of Catalogue information

A consensus has been agreed to between Wapiti breeders regarding parameters for performance data entered in our sale catalogues. We have all agreed to use standardised weighing times. Growth rates will be based on actual birth dates (or derived from foetal aging), estimated birth weights of 17kg for male calves and 15.5kg for female calves and their 12mth/December weight.

Animal Inspection

Inspection prior to sale by arrangement with Ben Beadle, or Dave Lawrence. On the day of sale, stock may be viewed from 2.00pm.

Velvet

Velvet from sale bulls will be on display on sale day and remains the property of the vendor. Please use gloves provided if you wish to handle the velvet.

Tb Status

Tikana has a C10 status. Last whole herd test was completed on 8/8/2019 and no longer whole herd test as we are in a Surveillance Disease Control Area.

Grazing

Grazing is available for a limited period, while purchasers await transport arrangements. Any grazing arrangements must be made with PGG Wrightsons office on sale day. All care and no responsibility. All deer must be insured.

Insurance

Transit and Livestock Insurance is recommended. Insurance agents will be present on the day to meet your requirements.

Guarantee

If a bull proves to be sterile, it will be replaced by an animal of similar quality or the purchase price refunded. The guarantee refers specifically to sterility and not to any other condition due to accident or illness. No claims after 12 months of sale.

GENETIC TREND GRAPHS

The solid green line represents the Wapiti average (23 herds). The dotted line is Tikana herd average (Herd number 8314)

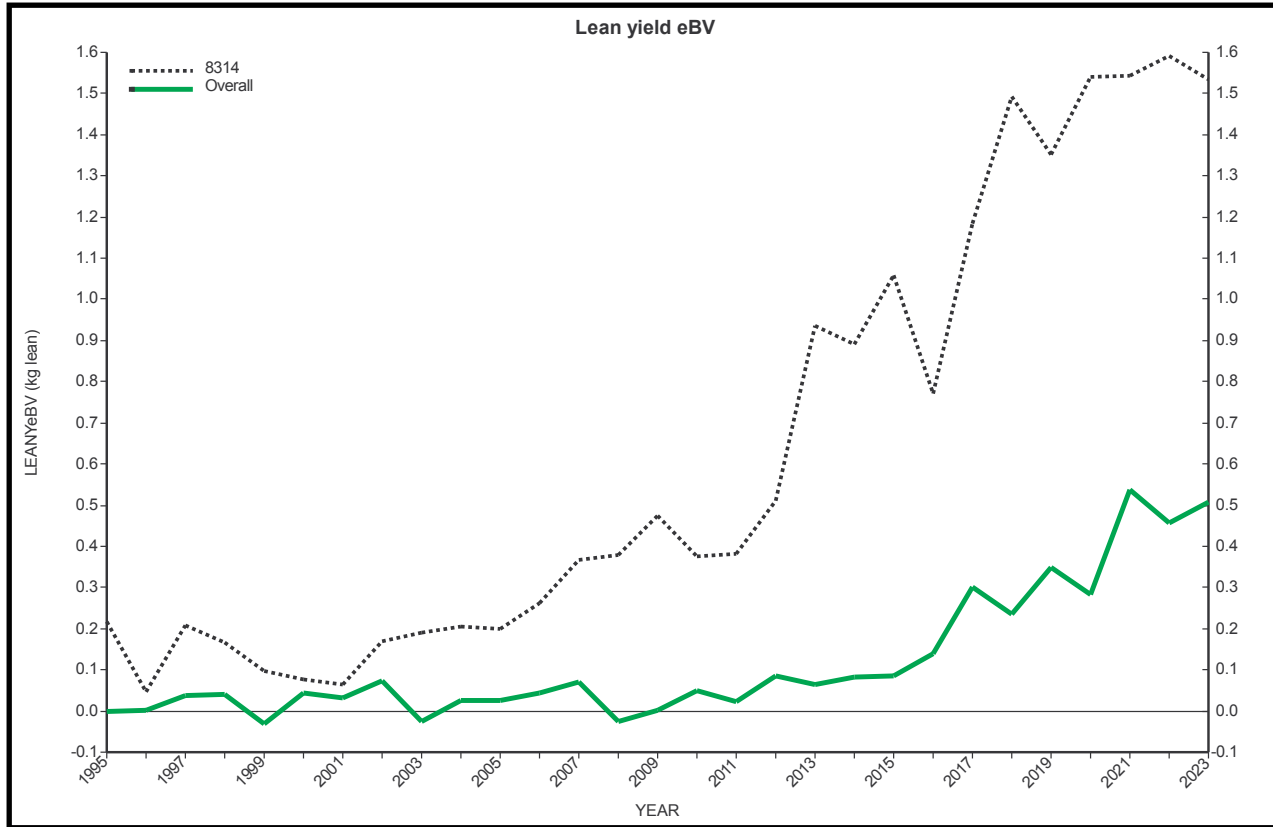

TERMINAL INDEX is a combination of growth and meat traits economically weighted. It represents how many more \$/hind mated a Wapiti bull will make you.

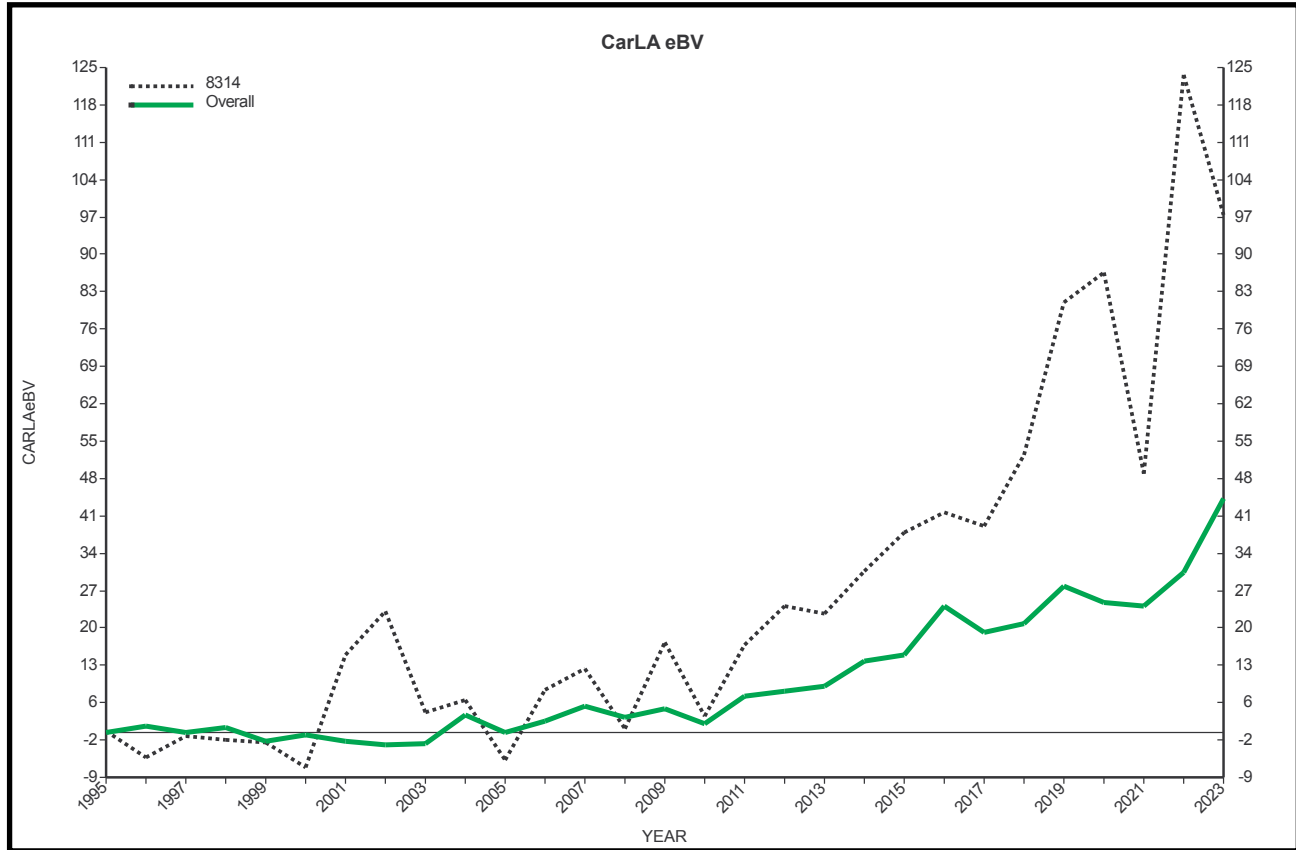

MEAT = Lean Yield = LEANYeBV

The Lean Yield BV is an expression of the amount of lean muscle per kg of carcass, adjusted for an average 12-month carcass.

The **LEANYeBV** balances all available meat information to indicate above or below average muscling/per kg carcass weight.

PARASITE RESISTANCE = progeny of high CARLA sires grow faster, cope better with parasite challenge and shed less eggs and larva onto pasture

WE ALSO SELECT FOR:

- GROWTH = Yearling Weight = WT12eBV** How many kg heavier at 12 months old than the 2005 Wapiti average
- MEAT = Carcass Weight = CWeBV** How many more kg of carcass than the average 2005 Wapiti
- VELVET = Mature Velvet Weight = MVWeBV**

CONDITIONS OF SALE

1. The sale will be conducted by PGG Wrightson with the conditions of sale as set down by the New Zealand Stock and Stations Agents Association, a copy of which is exhibited in the office on sale day.
2. Each lot becomes the purchaser's property and risk at the fall of the hammer.
3. Warranties and Insurance are covered under separate headings.
4. Terms are strictly cash unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days of sale shall bear interest, at current rate per annum from the date of sale.
5. The sale is conducted exclusive of GST.
6. A buyers commission of 4% is payable to non-participating companies and recognised independent agents introducing and accompanying purchasers to the sale providing prior arrangements (No later than 24hrs prior to sale) are made with PGG Wrightson.
7. Intending purchasers are required to register with the auctioneers prior to the commencement of the sale.
8. Except as otherwise expressly provided in these conditions, no guarantee, representation or warranty of any kind is made or given as to the soundness, condition or other quality of any livestock sold in this sale.

YOU NEED THE BEST. TO LOOK AFTER THE BEST.

**When it comes to the transport of stud livestock
you can't go past Downlands Deer and Studstock.**

During the past 40 years, we have pioneered the way in stud livestock transportation with purpose built trucks, calm expert livestock handlers, efficient nationwide transport routing and now with visual tracking from pick up to delivery.

Talk to Downlands Deer and Studstock today to ensure your livestock arrives in the best condition possible.

Genomic opportunities for New Zealand Deer

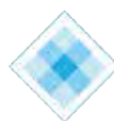

For 30+ years GenomNZ has been conducting parentage analysis for the New Zealand Deer Industry. We offer a SNP based parentage test, containing tens of thousands of markers providing a more accurate parentage assignment.

Breed
Composition

Pedigree

Profiling

This sequencing method provides precise genomic relationships and breed composition, as well as parentage analysis.

Ear tissue punches are our preferred sampling method (Allflex TSU). This sample type has been shown to provide both higher quality DNA as well as potential on-farm benefits.

DEER Select Bureau

Advice, systems and technologies to
improve deer herd performance

- The recording process is made as easy as possible for you
- Easy to use paper or electronic templates if required
- Reports relevant to the data received are returned to you after each set of data is analysed.
- Updated reports in your chosen format are available on request at any time.
- Reports tailor made for you and your breeding objectives
- Technical advice

Terms for Lots 19 to 22

- Wapiti cows will be mated to high quality Tikana Bulls
- Cows will be pregnancy scanned in May
- Purchaser will be liable for 25% of auction day bid at fall of hammer
- Balance due following notification of positive scan result
- Possession taken in June
- The 25% deposit will be refunded if Negative pregnancy scan

How good are these MA Wapiti Cows?

The Genetic Trend graphs (some are displayed in the front of the catalogue) show where the average Wapiti herd sits for any given trait or index

- **Growth** (WT12eBV) the average of these four Tikana cows is + 18.2kg which is **50% higher** than that of all other Wapiti herds
- **Meat** (EMAceBV) the average of these four Tikana cows is 1.6cm² which is more than **double** that of all other Wapiti herds
- **Terminal Index** (TI) the average of these four Tikana cows is **\$29.23** which is **55% higher** than that of all other Wapiti herds
- **Velvet** (MVWeBV) is within herd only.

263/12 - Sire Storm was an outstanding bull who was sold to Clachanburn Elk and cut 20.1kg EWSupreme @ 8 yrs and was then trophied (impressive 525 IOA). All her progeny have high growth values - an R2 son was 126kg at 100dys then 221kg by 12mths old and has a Terminal Index of \$45.66

510/15 - A Nepia(30.2kg EWSupreme @ 13yrs) cow who is the dam of our current sire Roosevelt (19.3kg EWSupreme @ 4 yrs) Another son by YUKON sold to Raincliff for \$20,000 last year. She has an Expectation son in this year's sale

541/15 - She has had 3 sons to date. Her first son cut 14kg EWSupreme @ 3yr and her second son by Prophecy cut 14.2kg EWSupreme @ 3yrs and sold to Deer Genetics for \$20,000 last year and this year cut 19.9kg EWSupreme for Kelly. Her third son by Roosevelt is a spiker this year

927/19 - Sire Crikey was a great all round bull. Only son to date is a Roosevelt spiker whose EMA was the largest of the 2023 cohort
